Dept.	Topic	Contribution
OSD 3	**LSPm Global KPI Automation**	• Developed a comprehensive Macro automation tool for the reconciliation of DCT data and LSP KPI report. • Flagging discrepancies in Shipment Count, Missing HBL/HAWB nos., Service Levels, Start clock date, Actual pick-up date, Actual time of departure, Actual time of arrival & Proof of delivery. • Identifying and classifying delays and analyzing the LSP Chargeability Status based on Bosch Delay Codes to determine and impose TAT Penalty on the LSPs. • Consolidating important data points for quick overview in a comprehensive dashboard.
OSD 3	**Overland TAT Penalty**	• Automated TAT Penalty calculation and LSP-wise summarization for overland shipments using Macros. • Generated an interactive dashboard to visualize OTD Performance and identify top problematic lanes.
OSD 4	**AA License**	• Created and deployed a Power BI Dashboard for tracking the current number of finished and pending imports and exports to ensure compliance with AA License requirements. • Summarized the total duty savings from AA Licenses across different plants.
OSD 4	**Late Filing Dashboard**	• Improved time series resolution by including weekly data for a more focused analysis. • Added additional visualizations to demonstrate trends in Late Filing reasons
OSD 4	**EXIM Compliance**	• Developed an HTML application that audits the HSN, BCD and IGST Matching Status across different sources and across time. • Separate analysis & visualization for EXIM 1, EXIM 2 & Third-Party data. • Monthly/Yearly data visualization and comparison. • Quick export as Excel/CSV report.
OSD 4	**Differential Duty Tracker**	• Used Microsoft Power Automate to send email notifications to stakeholders for tracking Differential Duty Payments using an excel spreadsheet.
OSD 4	**FTA Savings Summarization Tool**	• Developed and deployed (on Snowflake) a Streamlit application to automate the summarization of FTA Savings. • The tool can also export the summary as an Excel report.
OSD 4	**Invoice Splitting/Merging PDF Utility**	• Developed a secure html tool for easy invoice splitting and merging.
OSD 3	**DCT Docupedia Info Review**	• Reviewed FCC Architecture, Warehouse Architecture and TRAVIS Architecture descriptions on Docupedia to identify gaps and points of potential improvement.
OSD 4	**EXIM Data Consolidator**	• Developed an HTML tool to consolidate multiple CSV files into one report.
OSD 4	**Gateway EGM Error Entry from ICEGATE Portal**	• Manually fetched and entered the Gateway EGM error codes of shipping bills into a report.
OSD 4	**Invoice Data Extraction**	• Used Bosch's Gemini Enterprise to read and extract data from an unreadable image compilation PDF to eliminate manual data entry for invoice processing.
OSD 4	**EXIM 2 Demo**	• Created an animated video to demonstrate the workflow of EXIM 2. • Used HTML, text-to-speech (voiceover) and Canva to edit the video.
OSD 4	**Bad Cost Email Notification**	• Built an automation flow using Microsoft Power Automate for email notifications to plant-specific stakeholders regarding Bad Cost
OSD 4	**Extracted OOC Data Validation**	• Compared the OOC data extracted by a new in-house tool with existing Cygnet Reports to validate and identify and discrepancies.
OSD 4	**OOC Data Extraction**	• Tried to extract data from OOC document PDF into Excel using Power Query. • This approach is however not ideal and different methods are still being explored.
